Tagline

Every visit brings a little more.

A smarter way to collect rewards, earn perks, and build loyalty.

Visual concept reference. Rebuild the final master logo as clean vector artwork (SVG) before production use.

1. Logo & App Icon Direction

Primary concept: a geometric bunny head combined with a subtle “B” impression. Use a rounded-square app icon, emerald background, simplified white bunny face, and a small amber sparkle accent. The character should feel friendly but not childish; avoid overly detailed mascot illustration.

Asset	Recommended use	Guidance
Primary horizontal logo	Website header, marketing, merchant onboarding	Icon + Bunus wordmark; transparent SVG
App icon	PWA install icon, mobile home screen	1024×1024 master; export 512×512 and 192×192
Icon-only	Favicon, compact navigation, loading state	Recognizable at 32×32 px
Monochrome	Documents, constrained print use	Single-color dark or white variant
Reversed/white	Dark emerald backgrounds	White logo with sufficient contrast

Production note

The generated visual board is a direction reference, not a final vector logo file. Commission or create a precise SVG master, test legibility at small sizes, and export platform-specific assets.

2. Color Palette

Emerald & Mint is the core identity. Amber is reserved for rewards/achievement moments; coral is a secondary promotional accent, not a primary action color.

Emerald 800

Semantic colors

Status	Hex	Use
Success	#16A34A	Completed, verified, active
Warning	#D97706	Pending, expiring soon
Error	#DC2626	Failed, expired, blocked
Information	#2563EB	Informational messages

Accessibility rule: target WCAG 2.2 AA. Normal text should have at least 4.5:1 contrast; large text at least 3:1. Never use color alone to communicate status. Validate every foreground/background pairing before production.

3. Typography & Font System

Primary typeface: Poppins. Use for brand wordmark styling, headings, navigation labels, and buttons. Secondary typeface: Inter. Use for body copy, tables, forms, transaction data, analytics, and numerical values.

Poppins — heading sample

Bunus Rewards

Every visit brings a little more.

Inter — body and data sample

1,250 Points · Rp125.000 · 03 Nov 2026

Weights

Poppins: 400 Regular, 500 Medium, 600 SemiBold, 700 Bold. Inter: 400 Regular, 500 Medium, 600 SemiBold, 700 Bold. Use tabular numerals for balances, KPIs, transaction amounts, and timestamps.

Google Fonts references: fonts.google.com/specimen/Poppins and fonts.google.com/specimen/Inter. Prefer self-hosting optimized WOFF2 files for production performance and consistent loading.

Type scale

Element	Desktop	Mobile	Weight / line height
Hero	40–48 px	30–36 px	700 / 1.1–1.2
H1	32 px	28 px	700 / 1.2
H2	24 px	22 px	700 / 1.25–1.3
H3	20 px	18 px	600 / 1.3
H4	18 px	16 px	600 / 1.4
Body large	16 px	16 px	400 / 1.5
Body	14 px	14 px	400 / 1.5–1.6
Body small	12 px	12 px	400 / 1.5
Caption	11 px	11 px	500 / 1.4–1.5
KPI	32–36 px	28–32 px	700 / 1.15

4. Spacing, Radius & Component Dimensions

Token / component	Specification
Spacing scale	4, 8, 12, 16, 20, 24, 32, 40 px
Button height	44–48 px; radius 8–10 px
Input height	44–48 px; radius 8 px
Card radius	12–16 px
Modal radius	16 px
Borders	1 px neutral border
Desktop sidebar	240–260 px
Mobile page padding	16 px
Desktop page padding	24–32 px
Icon size	18–24 px; standard 20 px
Touch targets	At least 44×44 px where practical

5. UI Component Style

Buttons

Primary	Secondary	Outline	Disabled
Continue	**View rewards**	**Cancel**	Unavailable

Cards and surfaces

Use white cards on Gray 100 page backgrounds, subtle 1 px borders, and restrained shadows. Keep KPI cards consistent. Use Emerald 100 for selected/highlighted loyalty surfaces. Reserve Amber for reward unlocked/achievement states and Coral for promotional emphasis.

Status badges

Active/success = green; pending/expiring = amber; failed/expired = red; informational = blue. Pair each color with readable text and, where useful, an icon.

6. Iconography

Use Lucide outline icons, consistent 2 px stroke, rounded visual language, and 18–24 px sizing. Do not mix unrelated filled and outline icon families. Official catalog: lucide.dev/icons.

Navigation / feature	Lucide icon name
Home	house
Merchant	store
Rewards	gift
Stamp	stamp
Points	coins
Voucher	ticket
Members	users
Referral	users-round
Analytics	chart-no-axes-combined
Settings	settings
Subscription	credit-card
Notifications	bell

7. Product surface differentiation

Customer PWA: more friendly and engaging; bunny mascot may appear in onboarding, empty states, stamp success, and reward celebration. Use emerald/mint, rounded cards, clear progress, and delightful but restrained animation.

Merchant and Super Admin dashboards: professional, clean, data-oriented; minimal mascot usage, white/light neutral surfaces, emerald primary actions, consistent tables, clear hierarchy, and compact analytics.

Accessibility: WCAG 2.2 AA target; keyboard focus visible; labels for inputs; semantic controls; reduced-motion support; do not communicate state using color alone; test mobile widths down to 320 px.

8. CSS design tokens (starter)

```
:root {
  --bunus-emerald-800: #0B6B4F;
  --bunus-emerald-600: #10B981;
  --bunus-emerald-100: #D1FAE5;
  --bunus-amber-400: #FBBF24;
  --bunus-coral-400: #FB7185;
  --bunus-gray-900: #111827;
  --bunus-gray-700: #374151;
  --bunus-gray-500: #6B7280;
  --bunus-gray-300: #D1D5DB;
  --bunus-gray-100: #F3F4F6;
  --bunus-white: #FFFFFF;
  --font-heading: "Poppins", sans-serif;
  --font-body: "Inter", sans-serif;
  --radius-sm: 8px;
  --radius-md: 12px;
  --radius-lg: 16px;
  --space-1: 4px; --space-2: 8px; --space-3: 12px;
  --space-4: 16px; --space-5: 20px; --space-6: 24px;
  --space-8: 32px; --space-10: 40px;
}
```

9. Implementation notes

1. Treat this guide as the initial design system; create reusable Vue components and centralized CSS variables/tokens rather than duplicating styles.
2. Load optimized WOFF2 font files and define explicit font-weight mappings.
3. Create SVG logo masters and export PWA icons in required sizes.
4. Validate contrast for every text/background pairing.
5. Use CSS variables for controlled merchant theme customization; do not accept arbitrary merchant CSS.
6. Keep customer and admin surfaces visually related but differentiated by density and mascot usage.
7. Respect reduced-motion settings and avoid success animations until the backend confirms the transaction.
